

Ridge Fan

EXHAUST FANS

J&D Manufacturing's Ridge Fan is the perfect solution for year round air exchange, especially in the winter where it expels moist stale air and encourages an influx of fresh air to enter the facility.

This ridge fan features a design that incorporates the center fan body into the transition body. By eliminating the center fan body, we have created a ridge fan that takes up less area on the roof.

Features

- This is one tough fan, the powerful motor allows the fan to operate under high work loads
- Design allows easy access from the interior and exterior for maintenance
- Heavy duty one-piece seamless transition body for strength and durability
- Fan is pre-wired with 8' cord for 230V
- Poly shutter
- Tool-less removal of poly hood and shutter for easy maintenance and cleaning
- Fan features recessed fiberglass venturi and 4 blade poly propeller with cast aluminum hub
- Stainless steel slanted H-frame motor mount and stainless steel hardware
- Ridge fan transition and hood manufactured using a proprietary process resulting in a smoother, easier to clean surface
